## English – Prep

### Receptive modes (listening, reading and viewing)

By the end of the Foundation year, students use predicting and questioning strategies to make meaning from texts. They recall one or two events from texts with familiar topics. They understand that there are different types of texts and that these can have similar characteristics. They identify connections between texts and their personal experience.

They read short, decodable and predictable texts with familiar vocabulary and supportive images, drawing on their developing knowledge of concepts of print, sounds and letters and decoding and self-monitoring strategies. They recognise the letters of the English alphabet, in upper and lower case and know and use the most common sounds represented by most letters. They read high-frequency words and blend sounds orally to read consonant-vowel-consonant words. They use appropriate interaction skills to listen and respond to others in a familiar environment. They listen for rhyme, letter patterns and sounds in words.

### Productive modes (speaking, writing and creating)

Students understand that their texts can reflect their own experiences. They identify and describe likes and dislikes about familiar texts, objects, characters and events.

In informal group and whole class settings, students communicate clearly. They retell events and experiences with peers and known adults. They identify and use rhyme, and orally blend and segment sounds in words. When writing, students use familiar words and phrases and images to convey ideas. Their writing shows evidence of letter and sound knowledge, beginning writing behaviours and experimentation with capital letters and full stops. They correctly form known upper- and lower-case letters.

## Mathematics – Prep

By the end of the Foundation year, students make connections between number names, numerals and quantities up to 10. They compare objects using mass, length and capacity. Students connect events and the days of the week. They explain the order and duration of events. They use appropriate language to describe location.

Students count to and from 20 and order small collections. They group objects based on common characteristics and sort shapes and objects. Students answer simple questions to collect information and make simple inferences.

## Science – Prep

By the end of the Foundation year, students describe the properties and behaviour of familiar objects. They suggest how the environment affects them and other living things.

Students share and reflect on observations, and ask and respond to questions about familiar objects and events.

## Humanities and Social Sciences – Prep

By the end of Foundation Year, students identify important events in their own lives and recognise why some places are special to people. They describe the features of familiar places and recognise that places can be represented on maps and models. They identify how they, their families and friends know about their past and commemorate events that are important to them.

Students respond to questions about their own past and places they belong to. They sequence familiar events in order. They observe the familiar features of places and represent these features and their location on pictorial maps and models. They reflect on their learning to suggest ways they can care for a familiar place. Students relate stories about their past and share and compare observations about familiar places.

### History / Geography Achievement Standard

**Achievement Standards for banded learning areas may be compressed or delivery over time (for example six semesters from Prep to Year 2)**

## Health and Physical Education – Prep

By the end of Foundation Year, students recognise how they are growing and changing. They identify and describe the different emotions people experience. They identify actions that help them be healthy, safe and physically active. They identify different settings where they can be active and demonstrate how to move and play safely. They describe how their body responds to movement.

Students use personal and social skills when working with others in a range of activities. They demonstrate, with guidance, practices and protective behaviours to keep themselves safe and healthy in different activities. They perform fundamental movement skills and solve movement challenges.

## Technologies – Prep to Year 2

By the end of Year 2, students describe the purpose of familiar products, services and environments and how they meet a range of present needs. They list the features of technologies that influence design decisions and identify how digital systems are used.

Students identify needs, opportunities or problems and describe them. They collect, sort and display familiar data from a range of sources and recognise patterns in data. Students record design ideas using techniques including labelled drawings, lists and sequenced instructions. They design solutions to simple problems using a sequence of steps and decisions. With guidance, students produce designed solutions for each of the prescribed technologies contexts. Students evaluate their ideas, information and solutions on the basis of personal preferences and provided criteria including care for the environment. They safely create solutions and communicate ideas and information face-to-face and online.

### Design and Technologies Achievement Standard / Digital Technologies Achievement Standard

## The Arts – Prep to Year 2

By the end of Year 2, students describe artworks they make and those to which they respond. They consider where and why people make artworks.

Students use the elements and processes of arts subjects to make and share artworks that represent ideas.

### Dance / Drama / Media Arts / Music / Visual Arts Achievement Standard

## Languages – FOR EXAMPLE: French – Prep to Year 2

By the end of Year 2, students interact with teachers and each other through action-related talk and play. They exchange greetings such as *Bonjour! Comment ça va? Très bien, merci* and respond to question cues with single words or set phrases such as *Qu'est-ce que c'est? Un éléphant. Tu veux un croissant? Non, merci.* They choose between options when responding to questions such as *Tu veux le rouge ou le bleu?* They make meaning using visual, non-verbal and contextual cues such as intonation, gestures and facial expressions. They mimic French pronunciation, approximating vowel sounds and consonant combinations with some accuracy. They identify key words in spoken texts, such as names of people, places or objects. They use modelled examples and formulaic language to convey factual information at word and simple sentence level, such as making statements about themselves, their class and home environment, the weather or date. They write simple texts such as lists, labels, captions and descriptions. Students use some pronouns, prepositions and simple present tense forms of regular verbs.

Students identify ways in which spoken French sounds different to English and know that it uses the same alphabet when written. They identify words that are written the same in both languages but pronounced differently. They know that French is the language used in France and also in many other regions of the world. They know that language is used differently in different situations and between different people. They identify differences and similarities between their own and other's languages and cultures.

### Arabic / Chinese / German / Hindi / Indonesian / Italian / Japanese / Korean / Modern Greek / Spanish / Turkish / Vietnamese Achievement Standards
